

**Statement of Judith Diana Winston at the Cancer Moonshot Summit
June 29th 2016**

I have been working with Nick Kostovic on several issues and, while we are still a work-in-progress, I have had some very impressive results.

1. Nervous system: When I first came to Nick, I had a tremor in both hands. Now, except for when I wake up in the morning before I've eaten, that tremor is completely gone. We have worked on both my brain and my spine.
2. I also had a buzzing in my left ear and Vertigo when I lay down or when I got up from lying down. The Vertigo is now completely gone and the buzzing in my ear is very slight.
3. Bone degeneration in both hips: This made going up stairs very difficult and walking even short distances uncomfortable. I can now walk up stairs much better and can easily walk short distances. Both are consistently improving.

I feel very fortunate to have found Nick and his technology. I don't know how these problems could have been otherwise solved!
