

“Cancer Cured by Bio Electron's Photons Laser Acupuncture”

Mr. Nick Kostovic, Inventor & Therapist & Author

Corp., Address:

Kostovic Acupuncture by bio Electron's Laser, Corp.

President

3838 Carson St., # 307, Torrance, USA

Biography: Nick Kostovic.

Nick Kostovic was born on December 06, 1950 in an area now known as region Dalmatia, currently Split Croatia. I graduated from Split Gymnasium in 1969 with an Associate of Arts Degree in Humanities and Science.

I am Italian and US citizen. I have strong Italian ties through my father, Ivo Kostovic who mother was Italian. Through his father roots he has and Asian origins. He was born on the island of Drvenik-Veli when it was part of region Dalmatia, Italy called Zirona.

My mother Bosiljka Rodic Kostovic, great great grand daughter of Djurdja Mandic, mother of NikolaTesla with Russian roots, was born in city Omis also originally from Dalmatia region, Italy. Dalmatia was part of Italy for many centuries and currently Dalmatia is located in Croatia Europe.

Novel & Advanced Technology in Medicine by Bio Electron's Photons Laser Acupuncture

I, Nick Kostovic, for the first time in recorded history have eliminated magnetic from regular electromagnetic electricity. I also created the next six steps described below. I did this by developing a proprietary way of

reversed current RC to create what is bio electricity. The device I created is called the Kostovic BioTechnological Energizer, K-BTE Medical Laser Device

First, my center has successfully developed special current circuit and canceled magnetic from electromagnetic by new discovered RC reverse current.

Second, this device extracts bio electron photons from H₂O electric fluid by wire and wirelessly.

Third, while using the K-BTE device therapist has absolute control of speed/frequency of these released and enriched bio electron photons, by high Voltages /120V, 240V or more/and Micro and Nano Amperes. Today technology can perform only in AC industrial Mili Amperes /it is 1thousand point of 1amperes/ it is to high frequencies, and it is Electric shock therapy and even lethal if performed in higher Voltages from 12 V, to patient with human body resistance to the ground of 1000 Ohm wet.

Fourth, bio electrons photons are converted into the strength of Micro / 1million point of 1 Amperes/, or Nano /1billion point of 1 Amperes/ Amperes allowing the bio electricity even with multiple sheaves to softly penetrate into the whole brain, /helping brain to defeat cancer by “burn of” malignant cancer, clean from clots which caused stroke, destroying in the brain number of sick cells which caused different Neurological disorders, with no harm to the healthy cells/spine cord, hearth or any other physical organ with zero harm to the healthy cells. It was never before achieved in the world Medical science.

Fifth, in the process of extracting bio electron photons from the electric fluid it can include transference of hundreds of different natural acids as well as amino acids. Each biological agent BA is capable to transfer 3 to

6 different natural and amino acids, by enriched /coated/ bio electron photons in any physical organ including penetration of whole brain for example. World's science in Medicine is far behind such novel and advanced and most efficient technology in healing and cleaning human organs.

Sixth, these enriched bio electrons photons are wirelessly transferred through and olive oil coating on the skin enabling the bio electricity to softly penetrate / bio electron photons always penetrate softly on the skull or skin surface/ deeply and efficiently targeting the specific ailing human tissue.

This process is always skillfully directed into the body with the very gentle frequencies of Micro and Nano amperes allowing zero risk of negative consequences.

Definition of Bio Electrons' photons:

Bio Electrons' Photons are sub elemental quanta energetic forms of bio electricity. Bio electricity is converted from Tesla AC industrial electricity, connected by a special circuit. The special circuit enables us to produce RC reverse current.

Reverse current is a carrier of a magnetic charge and unmistakably "extracting", AC magnetic from electromagnetic charges. Industrial electrons directly release magnetic charges in the opposite direction from its AC electrons. Loosened electromagnetic charged electrons are converted in the lower stage/grade of "Sub Elemental Quanta Bio Electron's Photons" particles. "It never become Positrons"

Performing in Micro Amperes and Nano Amperes

Today's standard technological advances are *only* capable to perform laser medical surgeries at the strength of Mili Amperes which is: 1A= 1,000 Mili Amperes.

Today's standard technological advances are *only* capable to perform laser medical surgeries at the strength of Mili Amperes which is: 1A= 1,000 Mili Amperes.

Using the power of only 10 - 12 Volts of electricity this equates to electric shock or most probably lethal shock. So, it is too dangerous to heal unhealthy organs.

The Kostovic Bio-Technology Energetic Device has the ability to **extract bio-electron's photons from H₂O electric fluid**. Creating 1A= 1,000,000 it is **1 A = 1,000,000 Micro Amperes and 1A = 1,000,000,000 Nano Amperes**.

Using the power of **120 Voltages or 240 Voltages or more**, but creating Micro amperes or even Nano Amperes we do not create any electric shock, nor is it at all lethal. Instead Nick Kostovic discovered the technology to produce photons of electrons at this micro and nano amperes level that is gentle yet precise and efficient in burning off the dead cells, and energizing the hibernating healthy cells in the central nervous vascular system and the organs that he is working on.

Capable of performing all types of laser medical surgeries on the brain, heart, breast cancer or other cancers in any other physical organ with no harm to the healthy cells and no side effects. He has been performing treatments for last 15 years with more than 40,000 hours using the gentle strength of Micro Amperes and Nano Amperes.

-Micro Amperes maximum strength output between the first energetic field and the second energetic field on the floor of K-BTE (see diagram) are using 2 D/C Micro Amperes to 15 D/C Micro Amperes, with an average of 8.5 Direct Current, D/C Micro Amperes.

-This measured current is confirmed for the body's resistance from 1,000 /wet/ Ohms to 100,000 /dry/ Ohms or more, it doesn't even matter wet or dry it is not risk and it is absolute safe. The penetration of the bio electron's photons on the surface of the skin is **soft**. The severity of a lethal shock is absolutely eliminated as these Voltages **can not produce any dangerous electric shock to the body**.

Only our method of combining high Voltages **with low Micro Amperes and Nano Amperes** has the capability to destroy and kill all Cancer Viruses, Hepatitis Viruses, Heart Disease, brain tumors, ALS, Parkinson's, Dementia, Alzheimer's Disease, plus bacteria and microbes which leads to numerous other diseases that thrive in the decaying tissue and oxidized proteins. These prematurely aging organs are starved of their blood supply due to the plaque in the vascular system preventing nourishment & oxygen in the blood supply from reaching and feeding the basic cells in the organ's fiber tissue resulting in decay and the premature aging of the organs.

More basic information about canceling magnetic from Tesla Alternating industrial current AC, enabling us to produce bio electrons. Nobody, no science in the world did it, and it is biggest discoveries /after penicillin was discovered in 19 Century by Alexander Fleming/ in 20 and 21 Centuries. It will rescue tens of millions of lives each year world wide, from patients suffering from number of different terminal diseases.

Millions are dying each year because of lack of knowledge and lack of technology in Medical science in the world today! Sorry it is fact, each year die more cancer patient for decades, with all these top experts PhD new discoveries and developed technology for decades. Only my Novel and Advanced Technology in Science will radical exchange such disaster and significant decrease dying of millions of cancer patients..

By the way after 75 years of Nikola Tesla my great grand grand Uncle, it is first new developed technology in physics and

electromagnetic field, and we used in Medical science and it is first break through in healing from cancer, and others terminal diseases.

The KBTE Medical Laser Device is created in a proprietary method where we assemble in a special circuitry 120V- DC/AC/RC-reverse current (canceling the magnetic from the electric) which then is transferred through (H₂O) water electric fluid. After deleting the magnetic aspect we extract the bio electrons from this water (H₂O electric fluid), controlling their direction and strength (Micro and Nano amperes frequency). Lastly, we add in extracted bio electron's photons enriched with a number of natural and amino acids. We incorporate these natural acids into our Biological Agents Device. Therapist has absolute control on the frequency, speed and strength of these bio electron's photons.

Today's scientific formula for electromagnetic current power is: $I=V:R$ (I=current; V=Voltages and R=Human resistance to ground in Ohms). Today's standard technological advanced medical surgeries use lasers which can only perform at the strength/frequency of Mili Amperes, which is: 1A= 1,000 Mili Amperes. Please understand that if the human body's resistance to ground is 1,000 Ohms (wet) and using 120 Voltages which is 1.2 Mili Amperes or 1,200 Micro Amperes, then it's threshold impact, would result in electric shock and death. This is today's current official technological development in laser medicine.

Our KBTE Device's maximum strength output among the first energetic field and the second energetic field are 2 Direct Current DC producing Micro Amperes, the maximum level is 15DC Micro Amperes, with an average of 8.5 Direct Current, DC.

This measured current is confirmed for the body's resistance from 1,000 Ohms /wet/ to 100,000 Ohms /dry/ or more, it doesn't matter wet or dry. The severity of any lethal shock is absolutely eliminated as these voltages cannot produce a dangerous shock. The technician's hands feel

a slight tingling sensation. The client's hands on the first energetic field feels a slight repelling action (not an attracting sensation), because we have separated electro from electromagnetic industrial electricity converting it in bio electricity.

The KBTE medical laser device is such an innovative discovery due to this special circuitry of DC /direct current/, AC /alternating current/ and RC /reverse current/. Knowing the Human body's resistance to ground could be 1,000 Ohms (wet) yet using 120 voltages of AC we very safely produce the gentle effect of 12-15 Micro Amperes(DC). By utilizing this newly discovered Reverse Current and separating electro from magnetic we prevent electromagnetic shock. Our K-BTE device utilizing these gentle Micro Amperes frequencies we can effectively burn and disperse dead cells and oxidized proteins from fiber tissue. This frequency is 10,000 times less than the strength of today's developed laser technology. These energetic acupuncture type penetrations on the surface of the skin are soft, not at all an electric shock. It doesn't matter the human body's resistance is 1,000 Ohm /wet/, or 100,000 Ohm /dry/ or more, it just doesn't matter anymore because we are producing such a low frequency of Micro Amperes. We can even bring it down further to the Nano Amperes frequency which is 1 billionth of the amplitude.

On a daily basis, our cells are always being born, multiplying and dying. When we are young our bodies can disperse and get rid of all the dead cells in fiber tissue. We have cells that eat these dead cells and oxidized proteins and excrete it from fiber tissue. But with aging the dead cells are produced faster than the aging body can excrete them and they pile up.

The oxygen and protein rich blood supply is prevented from interacting with the muscle fibers due to this build up of dead cells. These nourishing proteins become oxidized proteins. These oxidized proteins become our number one (1) enemy, as they attract parasites, microbes and bacteria's etc. So now the human body not only has dying fiber tissue / the building blocks of muscle tissue/, but we also have different

diseases developing. If we are not able to cleanse this declining fiber tissue from the dead cells and oxidized proteins, then the fiber tissue will die, creating a domino like effect killing more and more fiber tissues, the building blocks of the human body's muscle's organs.

For the first time in history our discovery has enabled us to maintain the physical organs. As I clearly outlined we do this by first cleansing the fiber tissues, burning away the dead cells and oxidized proteins with our wireless biological electrical acupuncture treatment. After we have burned away the dead cells and oxidized proteins making space for the healthy blood supply to finally reach the fiber tissues, then body can rebuild healthy fiber tissue.

Cancer & Viruses

Our studies are based on 70 to 100 years of research in physics, biology, chemistry and electromagnetic fields, from many brilliant Nobel prize winners.

One brilliant German scientist, Otto Warburg won the 1931 Nobel Prize discovered:

- viruses avoid oxygen because it kills them
- viruses influence depraved/distorted healthy cells by lack of oxygen
- healthy cells degenerate and desperately extract sugar
- this degeneration of healthy cells produced number of new malignant cancer cells
- malignant cells are emerged mostly by viruses, and start to eat fiber tissue, oxidize proteins, and healthy fiber tissue
- cancer cells start growing into mass tumors
- Modified cancer cells, after “ripped off” its spread out from protection in the shell/membrane's nest. It needs oxygen for multiple of own cancer cells, so it starts spreading out from nest releasing malignant cells with growing metastases, multiplying in the human body....

About 2,000 helpless people die in the US every single day because of the false knowledge and practices in the current PhD community. In last 50 years, an increase of dying cancer patients reached an unprecedented 1,250 percent. Meaning, each year an average 20 to 25 percent.

According to our findings about this PhD, the results: DO NOT MATCH NUMBER OF PEOPLE WHICH DIE, IN COMPARISON WITH HEALED PATIENTS. THE INCREASE OF DEATH EACH YEAR, VERSUS THE HEALING OF CANCER PATIENTS DECREASE EVERY YEAR. IT IS A CRIMINAL ACT THAT THESE FINDINGS AND RESULTS ARE NOT PROPERLY BEING HANDLED CREATING A DISASTROUS SITUATION FOR THESE PATIENTS.

Radio static surgery of Boron 11 isotopes make fission in Helium 7 and Lithium 4 a powerful supplement to feed/nourish cancer cells and even release Gamma photons which become a powerful killer of healthy brain cells. Gamma photons kill all of the healthy brain nerve cells on its path. Chemotherapy, after long usage, instead of treating and killing the cancer cells ends up nourishing the cancer cells in more than 70 percent of cases. After that, the cancer cells may blow up/explode and kill the patient in a few days via horrible torture in which the cancer starts eating away the closest physical organs, fiber tissue and bone tissue. Such important information is being suppressed from the public which is an inhumane crime to these patients.

Science has confirmed that acids such as Oleic/linoleic acids, lemon/lime acids, non-ripped fig tryptophan acids are the most powerful killers of cancer cells based on Lab results in NIH and Baltimore Institute etc. research. However, they were never able to extract and

transfer their healing properties to cancerous affected human's physical organs, since they had never discovered or developed bio-electron lasers.

Bio electron lasers are able to transfer these natural acids. With pure 99 percent sugar cane alcohol and above mentioned natural acids, when converting bio electrons by these acids in enriched / coating bio electrons, we received the most powerful destroyer of different malignant cells and metastasis, with no harm to the healthy cells.

Today's official sciences in Medicine is far behind this new technology

Bio electrons carry natural acids in energetic form, and its fuel depends on huge amounts of oxygen, which is capable to destroying the viruses. Oxygen from a bio energetic form of bio electrons are destroying viruses, and there is nothing else capable of doing this and receiving such results in today's world's modern technology. We continuously destroy viruses by using these energetic natural acids which are coating bio electrons, enabling them to start powerfully destroying also known as "burning off" the cancer cells, oxidize proteins, parasites, etc.

Bio electrons have the capability to be directed from two or more opposite directions using biological agents on a particular spot, powerfully destroying tumor masses, by eliminating/killing the malignant cancer cells. Destroying the cancer cells by enriched bio electrons could be monitored from a ultrasound machine from minute to minute. This is important clue and evidence that the technology is working. A well-known institute in Tel Aviv Israel called Tehnion, based on our document, is testing and confirming this method of striking the cancer with Industrial electrons / they never developed bio electron laser / and monitoring by ultrasound moment by moment.

Furthermore, 99% pure sugar cane alcohol can produce an impact for cancer cells simulating as “Volcano Lava” and this extremely powerful method, melted this sugar’s cancer cells own ingredients’ in the form of glowing red-hot sugar. It started to melt down its “own cancer cells” with no harm to the healthy cells. It is the only way to defeat cancer, and we are the only establishment in the world capable of succeeding with a 100% of destroying malignant cancer.

For this reason, only we are capable of saying: "I am able to definitively tell you that curing cancer is no longer a dream. It has become viable reality with my newly developed advanced, priceless, innovative technology. I have personally been successfully in treating and curing cancer for the last 20 years, 3 years in Europe and more than 16 years here in the USA. The prototype of my K-BTE Medical Laser Device has logged over 40,000 hours of direct use. The K-BTE equipment has no side effects and is affirmatively physiologically safe causing no harm to healthy cells. This developed technology is based on Natural phenomena best described in comparison with some areas in Himalayas, and new era in healthcare bio-energetic technology emerged with zero risk which is 100% absolute safe."

My discovery and the technology I have developed is beyond today’s science, including the U.S.A. and other world wide science communities; they are far from achieving what we have accomplished in Medicine, Electromagnetics, and Quantum Physics, Quantum Biology, and Quantum Chemistry.

Effective use of K-BTE medical laser device in malignant cancer cases

Patient D. is a 69-year-old female who had six malignant brain tumors with multiple lesions.

This description is one of the most significant examples of healing malignant cancers with the K-BTE medical laser device, after UCLA radio static surgery failed.

Patient D. was diagnosed with malignant hemangiopericytoma. There were multiple lesions throughout the brain. One tumor was located in the occipital region, two tumors were in the right frontal region. Additional tumors were growing including the left parasagittal motor and apex of the parietal region and one positioned in the left frontal area. Due to the multiplicity of lesions, the doctor at UCLA could only suggest radioactive radiation therapy on the entire brain. This treatment is highly dangerous with a bleak prognosis.

When the entire brain is treated with radioactive radiation it prevents spinal fluid from clotting. The patients can't survive and they will begin to lose their memory, gradually be paralyzed, become blind, and have a dramatic weight and hearing loss leading to death. Patient will die in less of the two months. Patient declined this radiation treatment and opted for our bio-electric surgery and therapy at the Biotechnological Health Center.

The beginning of therapy for Patient D. was very painful. Our treatment is to wirelessly send biophotons to kill the multiple lesions of cancer cells, a total of six (6) tumors within the brain.

We attacked the cancer cells with bio electron's photons, enriched by fig acids, lemon acids, and Oleic and Leno Oleic acids. These converted and the enriched electrons are now put in kind of the elemental energetic form of the bio-electricity. Using this bio electricity of enriched electrons by natural and amino acids we were able to wirelessly burn

away the cancer cells from the brain tissue without harming the healthy cells enabling the body to easily excrete them.

These elementary energetic values of bio electron's photons penetrated deep into the brain, immediately started to combat by burning the multiple lesions away, and destroying the tumors.

With each session, the pain lessened and became more tolerable. After 58 treatments, multiple lesions were "burned off" and completely destroyed.

Also, three mass tumors were shrunk and another three new mass formations tumors were destroyed and dispersed-vanished, with no side effect. All unhealthy cells dispersed with no negative side effects.

The brain recovered and Patient D. returns to a normal functioning vital life. This was all accomplished with no harm or injury of any kind to any healthy cells.

Additional 35 treatments were provided on Patient D's brain, just as for preventive measures, to make sure there were no hidden unhealthy cancer cells. Utilizing this same process of transferring elementary laser beams of enriched electrons of "biological electricity" throughout the brain we were strengthen the brain in reviving and regaining the natural flow of neuron electrical and motor impulses.

When Patient D. and I visited her former UCLA doctor, their medical records confirmed our unprecedented successful healing process. After Patient D.'s successful recovery, she continued to live a healthy and vital life for an additional 5 years.

K-BTE Medical Laser Device which performs bio electric surgery and therapy, provided improvement in healing, that are based on sufficient

and valid scientific evidence and has demonstrated that the K-BTE device as labeled will provide clinically significant results while it does not present an unreasonable risk of illnesses or injury associated with the use of this device.

Patient E., a 13 years old female, showed the pituitary gland was enlarged with bilobed 1.7 cm tumor mass abutting the optic chiasm, consistent with a macro adenoma. It caused an increase of prolactin registering 49.4 NG/ML and TSH to 487mU/L. Pituitary gland tumor are caused an unbalance level of TSH and Hyperthyroidism (over active thyroid).

Therapy was performed with K-BTE medical laser device . The enriched bio electron's photons were transferred in the form of elementary laser's beams of biological electricity through biological and mineral the agents (gold and pyrite), penetrating deep into the mid brain. The first cycle 25 sessions of treatment powerfully destroyed the mid brain pituitary gland lesion.

Prolactin levels came down to 10.17 NG/ML and TSH levels came down to 19.61 UIU/ml.

The second cycle consists of 26 sessions, the lesion was struck with the same technique. Through this exclusive bio electric surgery and therapy, we effectively eliminated the extension of the lesion and tumor mass that was affecting the optic chiasm..

As a result, the brain blood stream was normalized, vision was improved, headaches subsided and her lost menstrual cycle resumed. The bilobed pituitary lesion decreased from 1.7 cm (17mm) down significantly to 1.05 cm (10.5mm). Prolactin 13.7 NG/ML and TSH decreased to the appropriate level of 2.65 Mu/L. The Hyperthyroidism (overactive thyroid) caused by a pituitary gland brain tumor, was effectively returned to normal level 2.65 Mu/L.

The brain completely recovered and this was accomplished without any possibility of reversing or spreading of the malignant brain tumor, and without any negative side effects.

Patient F., is a 70 years old female with a type of lung cancer. The mass measured 3.8 cm, and was on the right side and had already metastasized.

The permanent striking of the tumor with elementary laser's beams of the bio electricity was done in an 140 sessions. The goal was to shrink and eradicate the possibility of any further growth. We struck the affected areas of the lungs through the front and back of the body.

Multiply sheaves of the elementary laser's beams of enriched bio electron's photons of the biological electricity were administered through biological and mineral agent's gold and pyrite, effectively penetrating and burning the metastasis and the tumor mass.

We struck the mass with sheaves of elementary laser's beams of biological electricity tremendously increased by the elementary energetic values from virgin olive oil, (natural acids), Oleic and Leno oleic acids, antioxidants, non-saturated fats, and polyphenol. The "burned off malignant cells and tumor masses were effectively destroyed and naturally excreted from the body with no possibility of multiplying or spreading.

Patient G., is a 74-year-old male. The pathology report showed an aggressive type of prostate carcinoma. The present level of G lessons score is 4+4, and prostate gland is enlarged and measured 10.5 cm. The inflammation of the prostate gland has been present for the last year and his PSA measures 9.4 points. The patient noted frequent attempts to urinate especially throughout the night.

The bio electric surgery and therapy was performed by K-BTE medical laser device, striking the prostate gland and surrounding areas. After 20 sessions of therapy Patient G. had a MRI with and without contrast. Reports confirmed that the patient was cancer free, with no inflammation and the prostate gland showed slightly larger than normal. Blood tests measured PSA levels at 5.6 which had decreased from 9.4.

The prostate gland shrunk from 10.5 cm to 5.5 cm. The 5.0 cm of difference consisted of cancer cells, dead cells, piles of oxidation proteins and rotten tissue. These piles of oxidation proteins and rotten tissue had been “burned off” by K-BTE device creating no harm to the healthy cells and with no negative side effects. This is the first case in the world to eliminate 5,0 cm of sick unhealthy tissue from prostate gland without “standard” surgery. Normal urination was restored.

The vascular system of prostate gland was cleaned from any internal congestion caused by harmful cholesterol. Also, the gland was cleaned from any dead cells caused by oxidation of proteins. These causes of oxidized proteins have a crucial impact in development rotting tissue and aggressive malignant cancer. The function of the prostate gland was restored by performing bio electric surgery and therapy using K-BTE medical laser device.

The aggressive malignant cancer was cured. Additional treatments were provided for the recovering and the regeneration of the prostate gland, and bladder, as well as restoring PSA to the normal level. Patient G. is living a vital and healthy life with fully functioning prostate and bladder.

The thyroid gland tumors cause imbalanced THS levels. With our bio electric therapy Hypothyroid (under active thyroid) can be recovered. We approached the thyroid gland with enriched electrons of the elementary laser’s beams in our revolutionary effective healing process.

We wirelessly direct elementary laser beams to penetrate into the thyroid gland and surrounding areas cleansing the glands vascular system of the congestion from unhealthy cells as well as the piles of oxidized protein and the dead cells inside the gland fiber tissues.

The dying of cells is caused by the oxidation of over compressed toxic proteins. Performing “bio electric” surgical and therapy makes room for new healthy cells and proteins. Simultaneously, the new cells are stimulated and nourished by the elementary ingredients in biochemical links of enriched bio electron’s photons with natural and amino acids.

Superior and inferior thyroid arteries, superior middle and inferior thyroid veins were cleansed.

The veins, arteries and capillaries filled with sticky layers of harmful cholesterol, and clots were dispersed, with no harms to the healthy cells, and without any negative side effects. The tumor cells were killed and the tumor shrunk.

The remaining dead small tumor mass posed no discomfort so Patient decided to leave it. But it could have been surgical removed if the patient wanted, as there is no longer any risk of spreading living tumor cells. If the tumor was living, then with any surgical procedure there is a 99% chance of those cells spreading throughout the body.

These techniques performed by our K-BTE medical laser device eliminated the Hypothyroidism (under active thyroid) returned the thyroid gland to normal function and TSH levels to normal.

Patient H. suffered from planocelulare larynges cancer. The cancer was progressing. The evaluation revealed an affected mass of 3.5 cm.

The K-BTE medical laser device was used in the energetic cycle of 125 sessions on Patient H cancer. We struck the tumor mass with elementary beams of enriched bio electron's photons of the biological electricity simultaneously from both sides of the throat. The sheaves of enriched elementary beams easily struck the cancer mass, penetrating deeply in the throat area. The mass was reduced. The malignant cells were effectively destroyed eliminating the possibility of these cells multiplying. This malignant tumor of 3.5 cm mass was ultimately destroyed without any side effects. The mass was completely reduced and vanished.

Patient I. suffered pancreatic cancer. After only 90 sessions (a short treatment) using the K-BTE medical laser device and striking by enriched bio electron's photons, the tumors in the pancreas were blocked and shrunk. The metastasis through pancreas and liver were destroyed and the Patient I regained a fully healthy life.

Patient O. was suffering from malignant skin cancer on the face and skull. These malignant unhealthy cells were struck "burned off" by bio electron's photons enriched with different natural and amino acids. Although Patient O was in very bad condition, was reported that the treatment performed by laser medical device K-BTE, was not painful. In only two months (we consider as short time use), skin cancer was completely eliminated, with no scars', no harm to the healthy cells and no negative side effects. Patient O was completely recovered, and cancer didn't return.

Brest cancer: Patient P. 80 years old, suffered from the breast cancer. The pills based on kind of the chemo therapy didn't stop swelling of tumor mass. Walter Reed Hospital only option was to suggest surgery.

Patient P. refused surgery and came to my office in Fredericksburg VA, in March of 2011.

Performing by K-BTE medical laser device, we released with our bio electricity's enriched bio electron's photons, penetrating through the skin, killing the unhealthy cancerous cells and significantly shrinking the tumor. The patient P. avoid surgery and returned to her healthy and vital life. Treatments were short term use.

I felt that the Obama camp was a completely ignorant administration regarding this. The USA dying rate for cancer is approximately 2,000 U.S. patients die each day, and 2,000 U.S. patients die from heart attacks each day. We could have rescued 90 percent of these patients. In US it is silenced.

It is currently an epidemic with how the FDA is handling these issues. With their current immunology, it will even increase the rate to 3,000 or 4,000 people to die each day, or even more because they have wrong approach. You will see it for yourself, these PhD exterminators have become even worse.
